Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 56-74, 76-110 are rejected under 35 U.S.C. 102(b) as being anticipated by Kogasaka et al.-EP0807415A2.

As to claims 56-74, 76-106, Kogasaka-'415 (line 33, col. 69 to line 48, col. 70; Figs. 110-112, for example) discloses retractor 401, a trocar as a dilator for an introduction of retractor 401 into a spinal location of a patient, at least five discrete segments 444 radially expanding in a non-linear manner, hollow tube 447 to receive a combination of a feed/suction tube and forceps and inherently a process including steps substantially as recited in the claims.

Notice that the recitations "notches" in the claims 87-98 are interpreted as different steps or degrees of expanding of discrete segments 444, which are controlled by how far the rod/tube 447 is pulled proximally.

Further, the recitations "first blade", "second blade" and "first connector"/"second connector" in claims 107-110 are interpreted as segments 444 and mesh 443.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 75 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kogasaka et al.-EP0807415A2.

As to claim 75, Kogasaka-'415 discloses substantially the claimed invention, except for explicitly using dilators/trocars to dilate a tissue. However, it is common sense to have trocars of different size for a choice of use and it would have been obvious to one of ordinary skill in the art to provide a physician more than one trocar for dilating and create smaller or larger passages as the physician sees fit.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.
